Career Summary

A perpetual learner who is looking to take technical skills and attention to detail and utilize them in a workplace environment where the development and collaboration of knowledge is not only encouraged but necessary.

Technical Skills

Node.js, JavaScript, jQuery, GIT, Github, MongoDB, MySQL, Firebase, HTML5, CSS3, Bootstrap, Materialize, Media Queries, APIs, JSON, REST, AJAX, WordPress, the command line, and computer science fundamentals.

Projects

DoorStep - Front End Developer

<https://austin-shep.github.io/Doorstep.info/>

A mock real-estate listing service that utilizes a test dataset provided by Bridge Interactive, Firebase user authentication, and location based listing through use of Google Maps. With these technologies we allow the user to create a profile, search for listings in select areas, and save their favorites for later viewing. Materialize.css was the chosen framework for styling, and JQuery for functionality.

Experience

Davis Food Co-op, Davis, CA

Sales, Cheese and Bulk foods

January 2018 - July 2018

Merchandised specialty foods and cheese displays to maximize product availability.

Made customers cheese recommendations based on contents of carts and flavor profiles.

Assessed the sales of individual products to determine which items should have higher focus.

Domino's Pizza, Sacramento, CA

Delivery

December 2016 - January 2018

Created and implemented a process to minimize the time spent preparing food in the morning.

Navigated busy inner-city streets at rush-hour to provide customers with a timely delivery service.

Coordinated with other drivers to dispatch the most efficient routes during high volume hours.

Education

UC Davis Bootcamp, Sacramento – *Full Stack Web Development* July 2018 - February 2019

A rigorous 24-week boot camp focused on the conceptualizing and creation of fullstack web applications. Skills learned consisted of HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, & MySQL.
